

SAFETHIE - SPEED BUMPS 75

heavy duty

A PRODUCT – INFORMATION

SAFETHIE - SPEED BUMPS 75 are made of extremely strong material. A biochemical process turns natural rubber into vulcanised rubber, which retains its shape when hot and remains flexible in the cold.

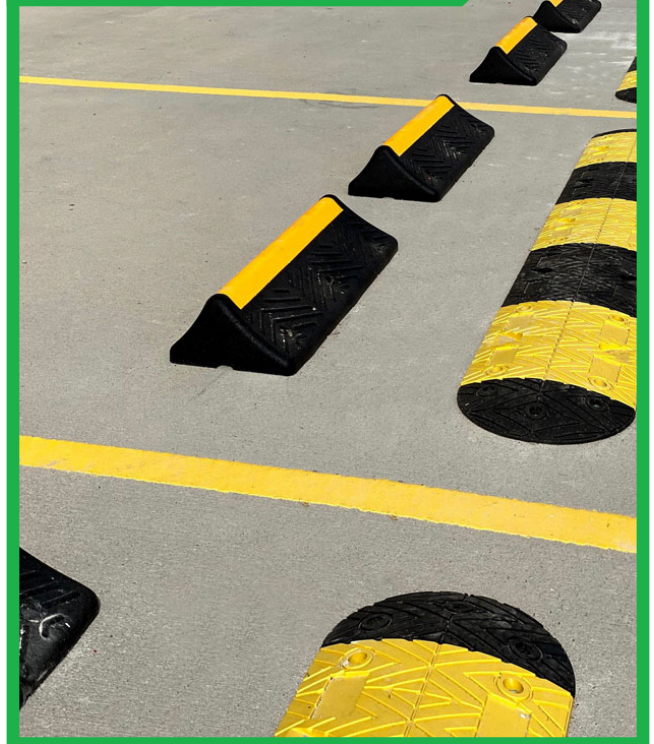

- UV-resistant
- Fully dyed through
- Weather resistant
- Abrasion resistant
- Extremely long life
- 100 % recyclable

Conventional speed bumpers are painted and not „dyed through“. After a short period of use, they are not safe any longer.

SafeThie - Speed Bumps 75 are a long life product and completely dyed through!

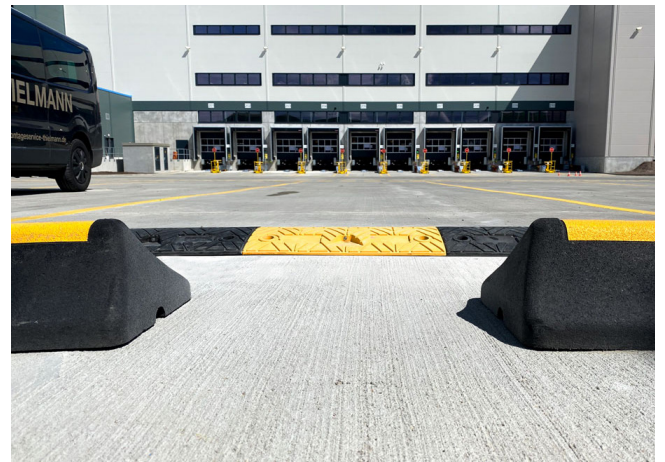

SAFETHIE - SPEED BUMPS 75
